Part of 210 acres devoted to Certified Frost-proof Cabbage Plants.
We produce over 200,000,000 a year.

The Union Plant Company Is a GROWING Institution!

"GROWING"—yes, "Growing" is our Keyword. Over 14 years ago, we started this company in a small, but scientific way. Today we have over 400 acres devoted entirely to growing plants. Every year has added its part to both the quality and quantity of our plants, and in like proportion have grown our customers and friends. So, we have **GROWN** to an **institution**—devoted entirely to plants and are in no sense a "back-lot" nursery.

Starting this year, we are featuring, as an addition to our regular list of plants a bargain assortment of rose bushes (see pages 8 and 9), also Peach and Plum trees, Grapes, our new **Onion** (see page 6), and quite a few more vegetables. So, please read and carefully preserve this book for future reference.

In all dealings with the **UNION PLANT COMPANY**, you are assured of the utmost satisfaction in every respect for our business has been built on the satisfaction of our customers, the fine quality of plants we raise, the care used in shipping and the personal interest we take in each order. We want yours!

Harvesting one of our Fields of Onion Plants. We Produce over 250,000,000 plants.

and
Frost-Proof

**Copenhagen
Market**

Cabbage Plants

Cabbage has certainly come into its own. It is recognized by the leading health authorities as an essential article of diet since it affords certain vitamins and roughage that are necessary to present day health. Sauer Kraut Juice is also popular these days. As a result of this recognition, the market demands have increased manifold, thereby making cabbage growing profitable to both the large and small grower.

But, look to your plants. Be sure they are of the kind that will bring profitable returns for the time and money spent. UNION CABBAGE PLANTS are CERTIFIED and FROST-PROOF. The certification of these plants by the various states surrounding our city ("A City of Two States—The Core of Four") is further proof of their reliability. Union Cab-

bage Plants are grown in open fields by the millions and are subjected to frost and freeze. They are hardy and frost-proof and have been known to stand temperature of 10 degrees above zero without injury.

UNION CABBAGE PLANTS are hand picked one at a time, and only plants with well-developed roots and stocks are sent to you. They are tied in bunches of 50, the roots being packed in damp moss, then wrapped in wax paper to hold the moisture. Other care is taken to furnish high quality plants, and to reach you in good condition.

When you plant cabbage—plant UNION PLANT FROST-PROOF, and Certified Plants, and be assured of an abundant yield and top prices.

SEE PAGE 5 FOR VARIETIES

GUARANTEE

If the increased yield of headed Cabbage from our plants, compared with the yield from cheaper plants of same varieties sold by others, planted at the same time and grown under the same conditions, is not worth more than the difference in cost, we will refund the entire purchase price. There is a reputation of over 14 years of honest dealing behind this guarantee.

Plant and Grow Cabbage This Way!

If you have it, select a piece of dark, medium low, well drained land; break it up as thoroughly as you can, then pulverize well with a good clod-breaker or harrow. Lay off your rows thirty inches apart. Make up your bed by throwing two furrows together with a turn plow. Firm this bed by running heavy roller down same; set plants 16 inches apart, well down in soil so that plants have the entire stem up to the first leaves covered with soil. If stem is left exposed, freezing weather will cause it to split, maggots get in these splits and eat up through the stem and destroy the bud. Be sure and pack the soil good and tight about the roots and stem of plant. These plants should not be fertilized at all until two weeks before your regular spring weather opens up. The land must be rich for growing early vegetable crops, it being best to apply fertilizer in spring even though plants are planted in winter. About two weeks before your regular spring weather opens up, take a turn plow and throw a furrow away from plants in each alternate row, running the plow as near the plants as possible in this furrow. Drill your fertilizer at the rate of one-half ton to the acre; two weeks later treat the other alley the same way. In covering the fertilizer be sure to work the soil under the leaves of the plant. After this time use your judgment; should the spring be wet, you want a high bed; if it be dry you want the ground as level as possible. Provided the instructions are followed, you can sit back and watch the finest crop of cabbage you have ever grown.

TREATMENT OF PLANTS ON ARRIVAL—If the plants cannot be set out the same day they are received, take them from the crate immediately, dip the roots in water and hill out into the ground, spreading the bunches out a little. In no case should they be left in the crate.

TWICE AS MUCH CABBAGE PER ACRE—We know how to produce good plants; you'll find no runts or weaklings among those you purchase; practically every one makes good. You'll easily get from 6 to 10 tons of Cabbage for each acre you plant.

When the plants come to you they look stunted and wilted, but don't bother about the appearance; plant all of them just the same. Place them in the ground a month before you'd set out home-grown plants, and then forget about them. Order now and be sure of Cabbage profits this season. Our guarantee protects you perfectly.

"Get a Load of This." A load of such fine cabbage means a lot of profit"

"Plants and Friends That Grow"

Note the well developed roots on these **Healthy, Hardy, Frost-proof, Certified Plants.**

Copenhagen Market—A big yielder, extra early. Fine round heads, averaging 8 pounds; very solid; small core. Plants are short-stemmed, heads being produced almost on the surface of ground. Ready for market as early as Jersey Wakefield and heavier yield per acre.

Succession — Largely a market growers' variety in many parts of the South, being used almost exclusively for shipping crops. Rather large size, well flattened on top. Firm and solid, a sure header and good shipper to North. Matures about ten days later than Early Summer and Early Flat Dutch, but nearly double their size.

Large Late Flat Dutch—An excellent keeping variety, more extensively grown for main crops than any other variety. This is one of the oldest varieties and needs no recommendation. Heads large, broad, roundish flat; solid and of good quality, tender and fine grained. Resists heat splendidly.

Early Flat Dutch—One of the most reliable cabbages for early spring planting. Plants are short-stemmed, upright, and have comparatively few and short leaves, the rows can be set close together. Heads large, solid, crisp and tender. Excellent for home use and to follow Wakefield and Succession.

Cabbage Plants

Union Plant Frost-proof **CERTIFIED** Cabbage Plants are now ready to ship. They come to you hand-picked and tied in bunches of fifty, roots packed in damp moss and wrapped in waxed paper, shipped in our special built boxes and crates which assures arrival in excellent condition. Safe delivery guaranteed.

Golden Acre—An excellent cabbage, the most desirable and big money making variety for the market gardener or for home uses. The earliest round head cabbage. Very solid. Head is firm, crisp and solid with center of clear white. Outside color medium light green. Average weight is eight pounds. A splendid keeper.

Glory of Enkhuizen—This Cabbage is only 10 days later than the Jersey Wakefield, but heads twice as heavy, ball-shaped, thin ribbed, very firm, splendid keepers, and of excellent quality. The color is a pale green. In appearance the heads are those of a small Danish Ballhead. Plants grow very uniform in size and shape and always head.

Early Jersey Wakefield—A favorite with market gardeners and truckers to grow for earliest Cabbage, both for home market and shipping. Makes compact, solid, blunt-pointed heads; small leaves, permitting close planting. Very hardy, not only to resist cold but other unfavorable conditions. Our plants are properly grown and selected with care.

Charleston Large Type Wakefield—Extra large, hardy, good shipper. A splendid strain of Jersey Wakefield, about a week later, with heads twice as large and weighing 8 to 12 pounds more. A good keeper and a strong favorite among southern growers as a main crop. May be planted as a second crop, to mature in autumn, if desired.

Prizehead Cabbage Plants

Our choicest variety and premium cabbage plants. Produce wonderful cabbage with heads that grow to great size and of excellent quality. In a Prize Contest a few years ago, the three winners won by producing cabbages that weighed 16½, 16 and 15 pounds respectively. These fine cabbage plants cost a bit more but are worth it.

Sent by Parcel Post—Prepaid: 100 plants, 60c; 200, \$1.00; 300, \$1.25; 500, \$2.00; 1,000, \$3.50; 5,000, \$15.00.

\$200 in Cash Prizes

Awarded for the Finest Half Dozen "White Beauty" Onions

TRADE MARK
Registration Applied For

A New Onion!

"Believe it or Not," but we have actually produced a new onion—"THE WHITE BEAUTY", an onion that is sweet and mild, one that will keep and keep. Our plants are certified, too! (This is the same type onion as the Sweet Spanish Valencia except that it is white. It is globe shaped).

The WHITE BEAUTY ONION was merely introduced to you last year, but now it is available for our customers. We worked hard and diligently all last summer to produce enough of the WHITE BEAUTY plants for this year, and are able to supply a LIMITED AMOUNT (500 plants—no more—no less) to each customer. So, order yours early before the supply is exhausted. Remember this is our onion, and grown exclusively by the UNION PLANT COMPANY. Remember the name and the trademark.

Plant "WHITE BEAUTY"! You May Win a Prize!

In order to popularize this new onion, we have devised a contest and rather than sell our entire output to a few, we shall give everyone a chance at a prize—limiting the number of plants. But, remember the supply is LIMITED. So here's an opportunity to try the WHITE BEAUTY ONION and at the same time you may win some real money. For the finest half dozen of these new onions, we are giving cash prizes. Read the rules of the contest.

Cash Prizes!

First Prize for the six largest and best onions.....	\$100.00
Second Prize for the second six largest and best onions....	50.00
Third Prize for the third six largest and best onions....	30.00
Fourth Prize for the fourth six largest and best onions....	20.00

We are offering these cash prizes to growers so they may find out how large and fine WHITE BEAUTY ONIONS can be grown. Plant them wherever and however you want to. There are no restrictions or red tape to this contest, but read the rules and enter the contest NOW!

500 PLANTS (No More—No Less)

On account of the limited supply of "White Beauty Plants", only one shipment of 500 plants will be sent each customer ordering. This has to be done so the supply will go around. Order early before it is too late!

\$200

Prepaid

Rules of Contest

1. To enter contest you must order not less nor more than 500 White Beauty Onion Plants from Union Plant Company, Texarkana, Ark., and notify us with your order that you are entering this contest.
2. Onions must be grown from our "White Beauty" Plants.
3. Send only six onions and do not wrap.
4. This contest is open to everyone except employees of Union Plant Co.
5. Onions entered in this contest must be shipped in ventilated boxes so they won't rot, and sent prepaid express or parcel post, to reach us anytime up to midnight October 15, 1932.
6. Your name and address must be plainly written or printed on outside of package.
7. No onions will be returned.
8. Judges will be the County agents of Miller County, Arkansas, Bowie County, Texas, and ourselves. Judges' decision will be final.
9. Prizes will be awarded as soon as possible after contest closes. If you have won, you will be duly notified by mail. Please do not write to learn who are the winners as they will be announced in next year's catalog.

"Plants and Friends That Grow"

◆ "In Union (Plants) There is Strength" ◆

SUPPLY THAT CRYING NEED FOR ONIONS!

Plant Union's

Certified

Onion PLANTS

If you plant UNION'S CERTIFIED ONION PLANTS instead of sets, you will be astonished at the difference. You will give your plants a better start, and get more onions to the square foot than from any previous planting where you used sets. Onion Plants make quicker, sweeter, larger onions. They keep better, are not strong and hot. They grow large and saucer-shaped with very small tops and large onions. The plants are cheaper too—\$1.00 worth of onion plants will set a much larger acreage than \$1.00 worth of sets. Plant Union's Certified Onion Plants and see for yourself.

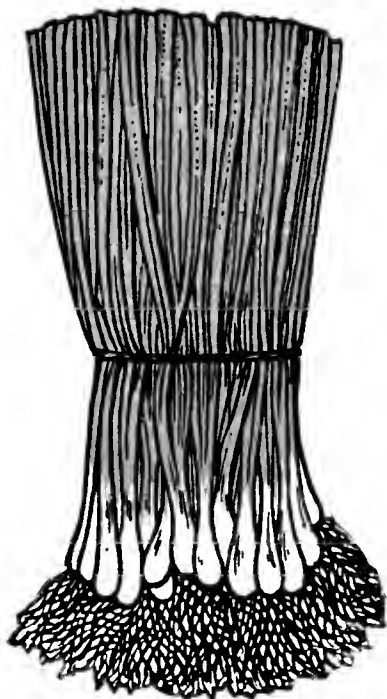

Our plants are grown in the open field where the frost does not get them, but where it is just cold enough to make them tough and ready for the field setting.

Shipment from November 1st to June 15th, but order now for immediate or advance shipments.

Prizetaker Onion

IF You want to know the correct way to grow onions, turn to page 6 of our last year's (1931) catalog if you still have it, or write us, and we'll send you complete directions.

Packed in bunches of 100. Note the uniform size.

handsomest onions on the market. Unusually good shipping and keeping qualities. Will ripen down evenly. This onion is highly recommended for the Southwest.

BERMUDAS

These Bermuda plants make quicker and yield large saucer-shaped onions, with very small tops and quite large onions—not hot and strong—and they keep.

Yellow Bermuda—Sometimes called White Bermuda, although it is a light yellow or straw colored onion. This is the better keeper because the light does not penetrate in the onion as with the white—thus a point in its favor. It is a flat, very mild flavored variety of high quality. An early onion.

White Crystal Wax—A rather new variety. Large pure white flat onions, popular with southern onion growers. Mildest and sweetest of onions. Fine for slicing. This onion, however, is not as good a keeper as the Yellow Bermuda. This is also an early onion.

SPANISH

Prizetaker—The King of the Yellow Onions, a big yielder and a sure cropper. The most productive and largest of all the yellow globe onions. Always grows to a uniform shape, which is a perfect globe. Invariably attracts attention on the markets on account of its size and beauty and is sure to bring a better price than other onions. They are even more attractive than the large Spanish onion, in fact these are excellent substitutes. Plants grown from American-Grown seed.

Sweet Spanish Valencia—This onion develops a slightly larger globe than the Prizetaker. Has an extremely mild flavor. This onion has already established an important place in the commercial markets. Always grows to a uniform shape, and is one of the

Plant Roses— The Loveliest of Flowers

Can You Resist this Offer at Such a Price?

The Rose is one of the most beloved and most adaptable of flowers, growing from coast to coast and from Northern climes to the Gulf of Mexico. The colors and varieties are almost unlimited.

In planting, the Rose lends itself to almost any arrangement; formal groups, borders, background for lower plants, or the wild beauty of the rambler.

This year we are also considering the beauty of your home, and have chosen the rose, which we are offering for the first time, as the most beautiful and dependable flower for home and lawn beautification. It will be hard to beat this assortment selected for a variety of colors, sizes and shapes.

Now you may include your rose order with the one for plants at such an unusually low price, you can hardly afford NOT to get this superb selection considering their beauty and fragrance. Add their charm to your home.

Red Radiance. Plants of wonderful foliage and vigor. Blooms constantly throughout spring, summer and fall. Brilliant red blooms of excellent form and intense fragrance.

Pink Radiance. In every way like Red Radiance except blooms are brilliant pink.

Lady Hillington. Beautiful apricot yellow with lovely buds and exquisitely formed open blooms—produced continuously.

Sunburst. Rich yellow flower shaded with orange. A splendid bloomer on long stem, excellent for cutting.

Special TwoYearOlds!

12 These twelve different varieties, as listed, in extra selected, strong two year old, field grown, budded plants. Sent Prepaid. **3⁷⁵**

You'll find a convenient order blank on Page Thirteen. Place order now before you forget, and regret.

Kaiserin Auguste Viktoria. The standard double pure white rose, which has been popular and in great demand for many years.

Columbia. Color, a vivid pink throughout the entire season. Long stem flowers, excellent for cutting.

Pink Cochet. An extremely popular tea rose well adapted for the South, with bright coral pink flowers shaded with deep rose.

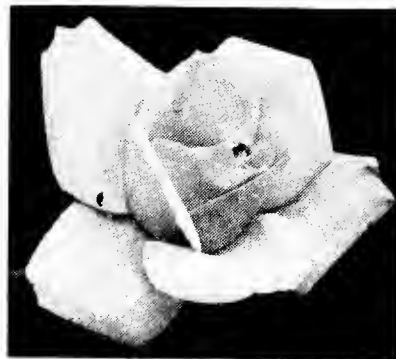

Mme. Butterfly. One of the finest roses. Bright light pink shaded with gold. A popular cut flower variety.

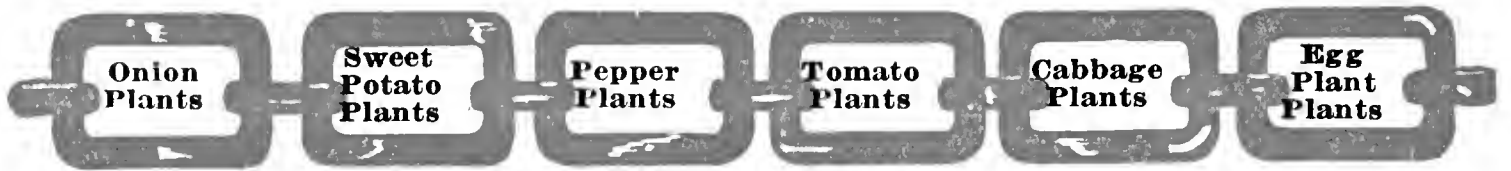

Templar. Clear even shade of red—medium size, strong grower and blooms all season. One of the newer roses.

White Killarney. A waxy white delightfully scented rose, with well formed buds on long stiff stems, excellent for cutting.

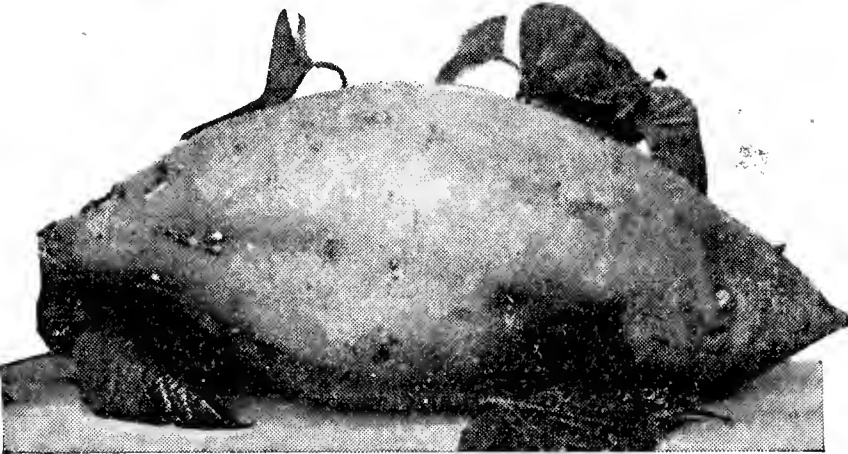

Frau Karl Druski. A magnificent white rose of delightful fragrance. Produced on long strong stems.

Etoile De France. Color rich velvety crimson, center ruby red. Large and double. Likes hot weather. One of the very best for South Texas and the Rio Grande Valley.

Miscellaneous *Certified* Plants

Union Sweet Potato Plants

There is always a good market for Sweet Potatoes as there is a universal demand for them—especially Union Plant Sweet Potatoes. Plant enough this year to supply your own table and have some for market.

Sweet Potatoes are one of the easiest crops to grow, cultivate and harvest; also very easy to keep if properly cured and stored. They do not sap the fertility out of the soil.

Our Sweet Potato Plants are well rooted and disease free. The slips are Certified. These plants are ready for shipment about April 1st, but place orders now for future delivery as shipments are made in the order received and as near the date as possible. As there is always a heavy demand for Sweet Potato Plants, we ask that you place your order at this time or as early as possible.

Porto Rico—This is the most popular southern variety of sweet potato and is the most generally grown. Porto Ricos are moist potatoes and there's a big and steady demand for them.

Nancy Hall—This is another favorite southern sweet potato, almost equal in popularity and demand as the Porto Rico. A good and easy grower and shipper and highly marketable.

Certified RUTABAGA

AMERICAN PURPLE TOP

Another addition to our growing family of plants!

The Rutabaga is an important member of the turnip family and is sometimes known as Swedish or Russian Turnips. However, it has a firmer flesh and is more solid than turnips and keeps later into spring. An excellent vegetable for the table and as a rotation crop.

Stock thrives rapidly and materially increases in value on a liberal mixture of Rutabaga and turnips, and this is one of the cheapest feeds to raise on the farm. Our plants produce a big crop of rich, juicy sweet Rutabaga. Order these now.

Certified COLLARDS

GEORGIA SOUTHERN

A popular Southern vegetable, a quick grower and a very large producer. Union Plant Georgia or Southern Collards are Certified! This is a vegetable that will grow good in very poor soil. It produces a large quantity of tender foliage on a tall stem. Although often sown in spring and summer, the principal sowing should be made during June, July and August. Transplant 2 feet apart in rows and cultivate frequently. Union Plant Collards are an excellent vegetable for late fall, winter and early spring, but are not in the best condition until after frost touches them. Plant and cultivate the same as cabbage.

Brussels Sprouts

Here's a great table delicacy! This is a vegetable that will bring fourfold returns for the time and small amount spent for it. Union Plants Brussels Sprouts are Certified! They are grown on a stalk in small cabbage-like heads and resemble miniature cabbages. Very tender and delicious when cooked. Hard frosts do not hurt them, but greatly improve their flavor. Plant and cultivate the same as cabbage.

Place your order for Union Plant Brussels Sprouts early and try this delicious vegetable this year. It's a profitable crop to raise too!

Broccoli

Here's is another hardy vegetable that is very easily grown. Broccoli is somewhat similar in appearance to Cauliflower, but much hardier and will withstand greater extremes of temperature.

Broccoli can be sown either in the spring or fall and makes a very delicious vegetable. Grown and cultivated like cauliflower. If you have not been successful with cauliflower, try Broccoli. It is so much easier to raise and you will be delightfully surprised at the large firm snow-white heads. Try them this year! Secure our certified plants.

Union *Certified* Tomato Plants

Here are other fine plants you may need. Even though you may not be ready now, place order in advance for future delivery.

Gulf State Market—100 Days—Very productive; excellent shipper because of tough skin. Globular shape, free from cracks. Color, purple and pink. Hardy vine.

Early Detroit—110 Days—A smooth globular shaped tomato of good quality. Large, early, productive, solid variety, flesh purple.

Greater Baltimore — 110 Days — Large, solid round, red blemish-free fruits. Main-crop variety as fruiter. Stout vines. Continuous cropper. Very dependable.

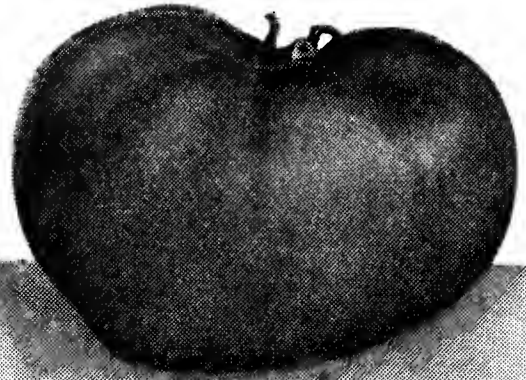

New Stone—115 Days—Great favorite in all gardens; used extensively by commercial canners. Late sort. Productive—large, solid, bright red, smooth fruit. One of the most popular tomatoes.

Livingston's Globe—Very productive, extra good all-around tomato, distinct globe shape. Always smooth, firm-fleshed, few seeds. Color, purplish pink. A very good keeper.

June Pink—90 Days—The earliest pink variety on the market. Solid fruit, borne in profusion. A large, red, smooth tomato, medium size, nearly round.

McGee—Of Texas origin. Bright crimson, solid, good flavor. Especially recommended for black land. Claimed to yield where other varieties fail.

Earliana—90 Days—The earliest, large, red

New Stone Tomato

smooth tomato on the market. Healthy vines with small foliage. Very productive. Medium size fruits, nearly round. Popular with canners.

Dwarf Champion or Tree—Distinct in foliage and habit of growth, being compact and upright. Fruits smooth, early, and of beautiful purplish red color.

Marglobe — A cross between Livingston's Globe Tomato and a French variety by the name of Marvel. It is a bright red variety not only on the surface but all the way through. It is about the same size and shape of Livingston's Globe. One of the best features is that it is resistant to wilt and nail head rust disease. An excellent shipping and market variety. Has very small core.

Union *Certified* Pepper Plants

Ruby King Pepper

California Wonder—This is a new variety which originated in California. It is one of the largest peppers grown and has remarkably thick and sweet flesh. Of excellent quality and a particularly heavy yielder.

Chinese Giant—140 Days—Large chunky peppers, bright scarlet when ripe, mild to eat, beauties to look at, 4 to 5 inches across and 4½ inches long.

Bull Nose or Large Bell—120 Days—Old standby. Large fruit, thick flesh, with broad end, almost square. Deep green when young, bright crimson when ripe. Mild flavor. Plants, 2 feet high.

Ruby King—110 Days—General favorite; most generally used. Longest of the largest! Brilliant red, 10 to 15 fruits to plant. Flavor sweetish; free from heat. Resists decay longer.

Long Red Cayenne—100 Days—Very hot, bright red pepper, long and slender. Fruit about 3 to 3½ inches long, ½ inch across at stem, end twisted to a point.

What "THEY" Say

About "Union" Plants or Union Plant Company:

Alpena, South Dakota, June 14th, 1931

"We received the plants you sent us and thanks for your prompt service. They were in fine condition, and are growing fine."

—ALFRED ARHART.

Royal, Arkansas, Feb. 28, 1931.

"Received our cabbage plants. I will always recommend the UNION PLANT COMPANY, and do all I can to get people to order from you."

—JOE ROACH.

Euclid, Ohio, June 5th, 1931

"We like your plants very much and also your catalog on account of giving instructions on how to plant."

—M. YURTZ.

Springfield, Illinois, June 10th, 1931

"I received Sweet Potato Plants, and they look nice. Much obliged until next year."

—WM. G. STRUESUKE.

Hudson, Michigan, June 13th, 1931.

"Received plants all O. K. in good condition, and are all set and growing."

—C. A. FOSTER.

Climax, Michigan, June 7th, 1931

"The tomato plants came in good condition and were fine plants."

—J. F. STOUGH.

Torch, Mo., June 1, 1931

"The Sweet Potato Plants arrived all O. K. today in good shape, and I am well satisfied."

—BRUCE H. ARMSTRONG.

Putnam, Oklahoma, May 18th, 1931

"I want to thank you for the tomato plants. They were in fine shape. You can look for another order next year."

—MRS. C. A. HUGHES.

Poplar, Wisconsin, May 16th, 1931.

"The cabbage plants arrived in fine condition, and are the nicest plants we ever had."

—I. MEALY.

Melber, Kentucky, February 10th, 1931

"Received cabbage plants today in 'perfect' condition. Appreciate your promptness and condition of plants very much."

—ROBERT H. WURTH.

Grant City, Mo., June 8th, 1931

"I received your plants in fine shape and am well pleased with my order."

—JOHN DeWITT.

Otwell, Arkansas, March 23rd, 1931

"I received the plants Saturday morning. They were in fine condition."

—BELLE JOHNSON

If you have no use for this Catalog, will you please give it to some one who may use it.
